

COMPARING FRACTION

Compare the fraction using $<$, $>$ and $=$

1) Comparing Fraction with the Same Denominator

$$\frac{2}{4} \text{ — } \frac{1}{4}$$

$$\frac{4}{10} \text{ — } \frac{5}{10}$$

$$\frac{28}{40} \text{ — } \frac{21}{40}$$

$$\frac{1}{10} \text{ — } \frac{7}{10}$$

$$\frac{20}{24} \text{ — } \frac{22}{24}$$

$$\frac{3}{5} \text{ — } \frac{2}{5}$$

2) Comparing Fractions with the Different Denominators

$$\frac{1}{3} \quad \square \quad \frac{7}{8}$$

$$\frac{1}{6} \quad \square \quad \frac{3}{4}$$

$$\frac{3}{8} \quad \square \quad \frac{2}{4}$$

$$\frac{2}{4} \quad \square \quad \frac{1}{3}$$

$$\frac{4}{5} \quad \square \quad \frac{4}{8}$$

$$\frac{1}{8} \quad \square \quad \frac{3}{4}$$

3) Comparing Fraction with the same Numerator

$$\frac{1}{4} \quad \square \quad \frac{1}{2}$$

$$\frac{1}{8} \quad \square \quad \frac{1}{2}$$

$$\frac{2}{5} \quad \square \quad \frac{2}{3}$$

$$\frac{4}{5} \quad \square \quad \frac{4}{8}$$

$$\frac{2}{3} \quad \square \quad \frac{2}{4}$$

$$\frac{1}{8} \quad \square \quad \frac{1}{2}$$
