"Tell us about your plans for future. Explain why these plans are important to you."

Going to College

When I finish school, I plan to go to college. I want to study computer science. I am interested in technology and how computers work. I believe that studying computer science will help me get a good job in the future.

After college, I want to work as a software developer. I want to create new programs and apps that can help people. I think this job will be exciting and rewarding. It will allow me to use my skills and creativity.

These plans are important to me because they will help me achieve my dreams. Going to college and getting a good job will give me the knowledge and experience I need. It will also help me support my family and make a positive impact on the world.
