NAME SOME PROS AND CONS OF TECHNOLOGICAL PROGRESS

Pros

- Thanks to science and technology people have achievements in transportation, communication and use of energy
- The great use of natural resources is damaging the environment. Now people have better living standards and much more free time.
- Such great technological achievements do not come without a price.

Cons

- New technology has led to creating weapons of mass destruction
- Medical knowledge has given people longer and healthier lives.
- The great intensity of human life leads to stress and makes us question about the advantages of high technology.
