Today's topic for the animal is orangutans. The name orangutan means "man of the forest." It's the largest arboreal mammal. Pongo pygmaeus is their scientific name.

Their long, powerful arms and holding hands, as well as their feet, help them to move through the branches.

Orangutans are one of the smartest primates. They can vary in height from 1 to 1.4 meters and weight from 29.9 to 99.79 kilos.

Orangutans live in Borneo's swamps and forests. They usually go down from the trees to explore the ground. They sleep at night and relax during the day on trees. They eat lychees, mangosteens, and figs, and drink from holes in the ground.

Threats to orangutans include habitat loss through deforestation and illegal hunting.
