

## WHAT DO YOU KNOW ABOUT SCIENCE?

### 1. Matching exercise

- |                   |  |
|-------------------|--|
| a. Photosynthesis | Carries genetic information.           |
| b. Gravity        | The smallest part of everything.       |
| c. Atom           | Energy related to temperature.         |
| d. DNA            | Process plants use to make oxygen.     |
| e. Heat energy    | Force that pulls objects to the Earth. |

### 2. True or false?

- All plants use photosynthesis. TRUE / FALSE
- The human body has 206 bones. TRUE / FALSE
- Gravity only works on Earth. TRUE / FALSE

### 3. Fill the blank.

- The largest planet in our solar system is \_\_\_\_\_
- \_\_\_\_\_ is the force that pulls us to the Earth.
- Human blood has \_\_\_\_\_ colour.

### 4. Multiple choices

- Which part of the plant make food using sunlight?
  - Roots
  - Leaves
  - Stem
- Which planet is the closest to the Sun?
  - Mars
  - Mercury
  - Venus
- What is the main function of the heart?
  - To pump blood
  - To help us breath
  - To digest food
