The secret powers of time

Do you often think about the past? Can you enjoy the present time, or do you worry about the future? The psychologist Professor Philip Zimbardo describes three types of people: past, present and future people.

What time type are you?

Past types
You enjoy remembering the past and sometimes you miss 'the good old days'. You worry about making changes or trying new things. You spend a lot of time with your family.

Present types
The most important thing is to feel good now. You like doing fun things with fun people. You don't have a healthy lifestyle. You avoid doing difficult or boring things.

Future types
You spend most of your time working, saving and planning for a better future. You eat well and exercise regularly. You can say 'no' to immediate pleasures. You don't mind waiting for the good things in life. Future people are usually more successful in work and study. But they often don't enjoy their free time because they are busy thinking about the next thing.

According to Zimbardo's research, most people are mainly a past, present or future type, although everybody is sometimes the other types. Ideally, we should try to have an equal balance of all three to be happy and successful, and to have good relationships.
