

Find the Prime Factors of the Numbers

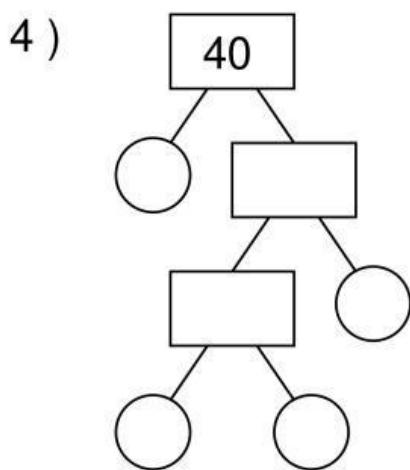

Prime Factors
 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 60$

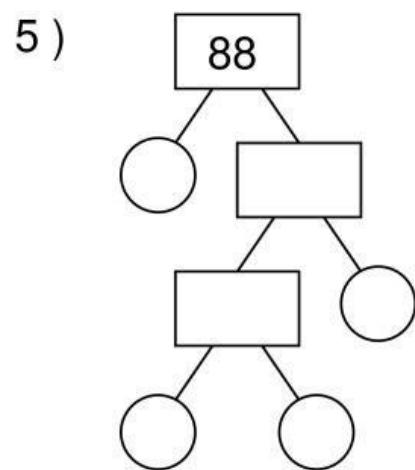

Prime Factors
 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = 18$

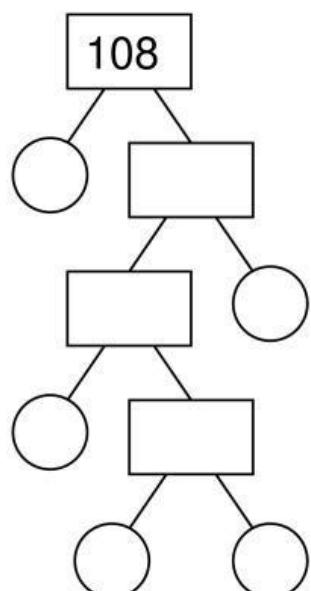

Prime Factors
 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 80$

Prime Factors
 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 40$

Prime Factors
 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 88$

Prime Factors
 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} \times \underline{\quad} = 108$
