Properties of Matter

Choose the correct answer in the following:

1. Copper turns to green when exposed to the environment is an example of:
   - Physical property
   - Chemical property
2. Odor or smell is a _____:
   - Physical property
   - Chemical property
3. The mass of the phone is 150g is a _____
   - Physical property
   - Chemical property
4. Anything that takes up space and has mass is…
   - Conductor
   - Matter
   - Energy
   - Soluble
5. If sugar dissolves in water, it is…
   - Reflective
   - Magnetic
   - Soluble
   - Strong
6. Which of this is not matter?
   - Trash
   - Floor
   - Air
   - Light
7. If a material allows energy to go through it has this property.
   - Solubility
   - Magnetism
   - Conductivity
   - Reflectivity
8. The picture describes which physical property:

   - Conductivity
   - Magnetism
   - Reflectivity
   - Solubility
9. The property that describes how shiny an object is
   - Conductivity
   - Reflectivity
   - Magnetism
   - Solubility
10. Wood can burn and change to another material is an example of
    - Physical property
    - Chemical property
