## Cluny Matric. Hr. Sec. School, Salem

Class: 8                    Maths                    Worksheet:2

### Statistics

**Match the following:**

1) Collection of information                    Frequency polygon

2) Data collected in person.                    Secondary data

3) Data collected by some other person          primary data

4) Difference between the
   largest and smallest value                   data

5) Class interval                               Upperlimit-lowerlimit

6) Inclusive series                             Range

7) Exclusive series                             Histogram

8) Graphical representation                     11-20,21-30
   of grouped data

9) Graphical representation                     10-15,15-20
   of ungrouped data

10)   Graphical representation                  pie chart
   of frequency distribution
