

1. Izračunaj neznane količine.

a) PRAVOKOTNIK

$$a = 7 \text{ m}$$

$$b = 12 \text{ m}$$

$$o = \underline{\hspace{2cm}} \text{ m}$$

$$p = \underline{\hspace{2cm}} \text{ m}^2$$

b) PRAVOKOTNIK

$$a = 4 \text{ cm}$$

$$b = 1,5 \text{ dm}$$

$$o = \underline{\hspace{2cm}} \text{ dm}$$

$$p = \underline{\hspace{2cm}} \text{ dm}^2$$

2. Izpiši podatke. Izračunaj obseg in ploščino pravokotnika.

$$a = \underline{\hspace{2cm}} \text{ dm}$$

$$b = \underline{\hspace{2cm}} \text{ dm}$$

$$\underline{\hspace{2cm}}$$

$$o = \underline{\hspace{2cm}} \text{ dm}$$

$$p = \underline{\hspace{2cm}} \text{ dm}^2$$

3. **Obseg pravokotnika s širino 4 cm meri 25 cm. Izračunaj dolžino in ploščino pravokotnika.

PRAVOKOTNIK

$$a = \underline{\hspace{2cm}} \text{ cm}$$

$$o = \underline{\hspace{2cm}} \text{ cm}$$

$$\underline{\hspace{2cm}}$$

$$b = \underline{\hspace{2cm}} \text{ cm}$$

$$p = \underline{\hspace{2cm}} \text{ cm}^2$$
