

SUMA DE FRACCIONS DEL MATEIX DENOMINADOR

Mira els exemples, recorda que per fer sumes de fraccions amb el mateix denominador **només hauras de sumar els numeradors**, recorda també que **els denominadors no s'han de sumar**

$$\frac{1}{6} + \frac{2}{6} = \frac{\boxed{1} + \boxed{2}}{\boxed{6}} = \frac{\boxed{3}}{\boxed{6}}$$

$$\frac{4}{8} + \frac{3}{8} = \frac{\boxed{4} + \boxed{3}}{\boxed{8}} = \frac{\boxed{7}}{\boxed{8}}$$

Ara fes tu les següents sumes:

$$\frac{2}{6} + \frac{4}{6} = \frac{2 + \boxed{}}{6} = \frac{\boxed{}}{6}$$

$$\frac{4}{9} + \frac{2}{9} = \frac{\boxed{} + \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{6}{10} + \frac{2}{10} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$

$$\frac{4}{12} + \frac{6}{12} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$

$$\frac{3}{9} + \frac{5}{9} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$

$$\frac{2}{7} + \frac{4}{7} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$

$$\frac{2}{8} + \frac{4}{8} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$

$$\frac{5}{9} + \frac{1}{9} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$

$$\frac{2}{8} + \frac{3}{8} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$

$$\frac{3}{6} + \frac{1}{6} = \frac{\square + \square}{\square} = \frac{\square}{\square}$$
