

Calculate each sum.

$$1. \quad \frac{1}{2} + \frac{3}{15} = \frac{15}{30} + \frac{6}{30} = \frac{21}{30} = \frac{7}{10}$$

Denominator Solve Simplify

$$2. \quad \frac{1}{3} + \frac{7}{17} = \text{---} + \text{---} = \text{---}$$

$$3. \quad \frac{1}{3} + \frac{3}{8} = \text{---} + \text{---} = \text{---}$$

$$4. \quad \frac{1}{8} + \frac{8}{11} = \text{---} + \text{---} = \text{---}$$

$$5. \quad \frac{4}{7} + \frac{4}{11} = \text{---} + \text{---} = \text{---}$$

$$6. \quad \frac{5}{6} + \frac{1}{19} = \text{---} + \text{---} = \text{---}$$

$$7. \quad \frac{1}{6} + \frac{1}{5} = \text{---} + \text{---} = \text{---}$$

$$8. \quad \frac{1}{5} + \frac{2}{4} = \text{---} + \text{---} = \text{---} = \text{---}$$

$$9. \quad \frac{1}{2} + \frac{3}{7} = \text{---} + \text{---} = \text{---}$$

$$10. \quad \frac{1}{3} + \frac{11}{17} = \text{---} + \text{---} = \text{---}$$
