

Paprastų trupmenų daugyba

1. Nuspalvintą dalį parašykite trupmena, tada apskaičiuokite:

$$\frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$$

$$\frac{\square}{\square} \cdot \frac{\square}{\square} = \frac{\square}{\square}$$

2. Sudauginkite:

a) $\frac{1}{5} \cdot \frac{1}{2} = \frac{\square}{\square}$

e) $\frac{1}{9} \cdot \frac{8}{11} = \frac{\square}{\square}$

b) $\frac{2}{3} \cdot \frac{1}{3} = \frac{\square}{\square}$

f) $\frac{4}{15} \cdot \frac{2}{5} = \frac{\square}{\square}$

c) $\frac{3}{4} \cdot \frac{3}{4} = \frac{\square}{\square}$

g) $\frac{10}{13} \cdot \frac{12}{13} = \frac{\square}{\square}$

d) $\frac{4}{7} \cdot \frac{6}{7} = \frac{\square}{\square}$

h) $\frac{17}{80} \cdot \frac{11}{60} = \frac{\square}{\square}$

3. Sudauginkite ir, jei galima, suprastinkite:

a) $\frac{1}{3} \cdot \frac{6}{7} = \frac{\square}{\square}$

e) $\frac{10}{11} \cdot \frac{33}{34} = \frac{\square}{\square}$

b) $\frac{2}{5} \cdot \frac{1}{4} = \frac{\square}{\square}$

f) $\frac{21}{50} \cdot \frac{10}{21} = \frac{\square}{\square}$

c) $\frac{5}{18} \cdot \frac{18}{25} = \frac{\square}{\square}$

g) $\frac{9}{100} \cdot \frac{20}{63} = \frac{\square}{\square}$

d) $\frac{4}{21} \cdot \frac{7}{8} = \frac{\square}{\square}$

h) $\frac{51}{99} \cdot \frac{6}{17} = \frac{\square}{\square}$
