Read the following passage about urbanization and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

Urbanization refers to the increasing number of people that live in urban areas. It predominantly results from the movement of people from rural to urban areas, driven by the search for better employment opportunities, education, and living conditions. As cities grow, they often face challenges related to infrastructure, housing, and social services. This rapid growth can lead to overcrowded cities, traffic congestion, and strain on public services.

One of the most notable effects of urbanization is the change in land use. As urban areas expand, agricultural land and natural habitats are often converted into residential and industrial areas. This can lead to a decrease in local biodiversity and affect ecosystems. Additionally, urbanization contributes to environmental issues such as pollution and increased carbon emissions due to higher energy consumption.

Urbanization also has significant social and economic impacts. On one hand, cities can offer more job opportunities, higher salaries, and improved access to education and healthcare. On the other hand, the rapid influx of people can lead to inadequate housing and increased cost of living. This disparity often results in the growth of informal settlements and slums, where living conditions are poor, and residents lack access to basic services.

Governments and urban planners play a crucial role in managing urbanization effectively. By implementing sustainable development policies and investing in infrastructure, they can mitigate some of the negative impacts of urbanization. Strategies such as developing public transportation, creating green spaces, and ensuring affordable housing are essential for creating livable and sustainable cities.

Technology and innovation also contribute to addressing the challenges of urbanization. Smart city initiatives, for example, leverage technology to improve the efficiency of urban services, enhance the quality of life for residents, and reduce environmental impact. These advancements can help cities become more resilient and adaptable to the needs of their growing populations.

Read the following passage about the role of technology in education and mark the letter A, B, C, or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

[I] Technology has transformed education in numerous ways, enhancing accessibility, interactivity, and the quality of educational resources. [II] Digital tools and online platforms enable students to access a wealth of information from anywhere in the world, breaking down traditional barriers to learning (Merrill & Smith, 2020). [III] Despite its benefits, the integration of technology in education also brings challenges, such as maintaining student engagement and managing screen time effectively (Wang & Liu, 2021). [IV]

One major advantage of technology in education is its ability to facilitate personalized learning. Unlike conventional classroom settings, digital platforms can adapt content to meet the individual needs and learning pace of each student. For example, many educational apps use algorithms to assess a student's progress and adjust activities accordingly, promoting a tailored approach to education. This allows students to learn in a way that best suits their unique strengths and weaknesses.

However, the increased use of technology in the classroom can have downsides. Excessive screen time is linked to a range of issues, including eye strain, reduced physical activity, and decreased social interaction. In addition, some students may feel isolated as they interact with screens rather than with peers, limiting opportunities for collaboration and teamwork (Rosen & Carrier, 2019).

To balance these pros and cons, educators are encouraged to blend technology with traditional teaching methods. This approach, often referred to as "blended learning," enables students to benefit from digital tools while still engaging in face-to-face interactions. According to experts, combining online resources with in-person activities can enhance learning outcomes, promoting both academic success and social skills. (Garrison & Vaughan, 2018).
