

TAXIS WITHOUT DRIVERS

I There is something new on the busy streets of Tokyo — taxis without drivers. A passenger just sits in the taxi and the taxi drives itself. At first, some people were afraid that these taxis were very dangerous.

A driverless taxi

From: ZMP.co.jp

5 However, until now these taxis did not have any accidents.

II Today, driverless taxis* take passengers only between two neighborhoods in Tokyo. Passengers pay for the ride on their cell phones. One of the first passengers to use this kind of taxi said, "The ride was so pleasant that I almost forgot there was no driver." However, there is someone from the company in the car to help if something goes wrong. But, so far, there were no problems.

III Saido Tanaka, the owner of the taxi company, says, "We are proud to be the first company to have taxis without drivers." Many people in Tokyo are excited about these taxis. In fact, there is already a list of 1,500 people who want to be passengers on future trips between the two neighborhoods.

IV There are a few reasons why Japan is a good place to use taxis without drivers. First, there are not enough taxi drivers in Japan these days. Also, there are more and more old people who do not drive anymore. And the older people who still drive have many accidents.

V The Japanese will soon need more driverless taxis for the 2020 Olympic Games in Tokyo. These taxis will take athletes and tourists between the sports events and the city center. These taxis will also drive between the airport and the center of Tokyo.

20 **VI** Mr. Tanaka believes that there will be no problems with the driverless taxis. He hopes they will soon be the only taxis on the road, both in Japan and in the rest of the world.
