Dolphins have a simple language. They are able to talk to one another. It may be possible for man to learn how to talk to dolphins. But this will not be easy because dolphins can not hear the kind of sounds man can make. If man wants to talk to dolphins, therefore, he will have to make a third language which both he and the dolphins can understand. Dolphins are also very friendly towards man. They often follow ships. There are many stories of dolphins guiding ships through difficult and dangerous water.

April Fool's Day started in the sixteenth century in Europe. Before that time, New Year's Day was celebrated on April 1st. Then a new calendar was introduced called the Gregorian calendar. January 1st became the first day of the year, but many people did not know about it. So those who continued to celebrate New Year's Day on April 1st were teased. They were called fools.

Nowadays we play jokes on people on April 1st. For example, someone might put salt in the sugar container so another person could "accidentally" put it in their coffee. Or someone might change the time on another person's alarm clock so that person would unknowingly wake up earlier or later than planned. Or maybe a person would tell a lie to make someone else shocked.

After we play the trick, we say "April Fool." Then the poor person realizes he was fooled. It is generally done in the spirit of fun and doesn't cause any real harm to anyone. Do you have any great jokes to play on anyone today? Try it out. Just don't forget to say "April Fool" when the other person begins looking a little confused.
