The Time Machine

- ① I am Professor Wong and I invented a time machine! My time machine lets you travel into the past* or the future* for five hours. My friends asked me, "Why do you need a time machine?" My answer was, "I want to meet my father when he was 10 years old."
- ② I packed a small bag and got into my time machine. I typed in the words, "1964, 11 Niven Road, Singapore". There was a 'whoosh' and a 'bang'... the machine shook* and spun* and in a moment I was in front of my father's old house at 11 Niven Road.
- ③ I saw four children looking for a lost dog. I knew them! They were my father, my Uncle Kelvin, my Aunt Peek and Aunt Janet. They told me they were looking for Blackie, their dog.

- ④ My father, my aunts, my uncle and I climbed up a hill and looked down into the houses in town. Then we sat down and rested. Suddenly, we heard a dog barking. "Blackie!" my father shouted. We saw Blackie behind one of the houses. He was chained* to a tree.

- ⑤ We ran to the house and knocked on the door. A man opened the door. "We want Blackie back," we said to the man. "Can you prove* that this is really your dog?" the man asked. My father called out Blackie's name and Blackie started barking and wagging his tail*. The man gave Blackie back to us.

- ⑥ We ran back home with Blackie. My five hours were over so I quickly ran to a dark corner. Suddenly, I found myself back in the present time. What an adventure!
