

Fill in the blanks with the right answer.

```
import java.util.Scanner;

class Time{

    public static void main (String [] args){

        Scanner read = new Scanner (System.in);

        System.out.print("Enter second : ");

        int secondEnter = _____

        int hour = _____

        int hourBalance = _____

        int minute = _____

        int minuteBalance = _____

        int second = _____;

        System.out.println ("Hour : "+_____);
        System.out.println ("Minute : "+_____);
        System.out.println ("Second : "+_____);
    }

}
```
