

Запишите координаты точек:

$1,05 + 5,1$	
$0,25 + \frac{3}{4}$	
$\frac{12}{4} + \frac{4}{12}$	
$1 + \frac{1}{3}$	
$3 - \frac{5}{6}$	
$3,03 + 0,3$	

Вычислите:

$$5\frac{1}{2} + 5\frac{2}{4} =$$

$$3 - \frac{8}{9} =$$

$$\frac{5}{13} + \frac{2}{3} =$$

$$20\frac{3}{11} - 4\frac{1}{3} =$$

$$\frac{3}{21} + \frac{4}{21} + \frac{7}{21} =$$

$$\frac{3}{8} + \frac{4}{6} =$$
