Ancient Chinese Science – Matching

Directions: Read each statement on the left carefully. Then draw a line to the correct invention on the right.

Made of special white clay that has a lot of kaolin in it. It was invented in the Sui Dynasty and perfected during the Tang.	Fan
Made of bamboo spines that stick out in the shape of a semicircle with silk wrapped around it. Used most by women.	Porcelain
Used by farmers during planting to insert seeds at a uniform depth. This tool prevented waste and uneven growth.	Wheelbarrow
This was made by mixing sulphur, charcoal, and potassium nitrate. It explodes and burns very fast.	Kite
A wooden circle with markings on it and a magnetic spoon on top. Used to see if houses were faced in harmony with nature.	Gunpowder
Hand driven vehicle with two handles on the rear side. Had two wheels and needed two men to operate it.	Seed Drill
Made of bamboo and silk. It was used to carry messages and explosives during the war.	Compass
