TA12. U6. Artificial Intelligence. Vocabulary 2

interact with	engage in	clarify	respond	imitate
provoke	capable	smart	effective	personalized
instant	complex	accurate	facial	recognition
virtual assistant	artificial intelligence	programme	software	platform
interactive	explore	robot	battery	vacuum cleaner
scientist	engineer	travel agent	analyse	evolution
exploration	milestone	appearance	ability	tropical forest
steep	slope	repair	arrange	improve
offer	activate	delivery service	portfolio	hands-on
proficiency	feedback	dangerous	mistake	endangered
identity	gesture	depend on	forced labor	guided
potential	limit	stimulus		

Exercise 1: Complete the sentences using the correct word from the list.

1. AI can help students improve their _____ by offering tailored exercises.
2. This robot is _____ of recognizing objects and moving around them.
3. Virtual assistants can _____ users in completing tasks like setting reminders.
4. The company created a new _____ to help developers build their own AI tools.
5. Scientists are working to _____ the role of AI in medical research.
6. The _____ was damaged, so the vacuum cleaner stopped working.
7. Advanced AI systems can _____ human gestures and facial expressions.
8. The new feature offers _____ customer support, helping users in real time.
9. Teachers use interactive tools to keep students _____ in their learning.
10. The AI system uses _____ technology to scan faces for identification.

Exercise 2: Match each word with its correct definition.

1. Facial	a) A major achievement or important event in a process.
2. Virtual assistant	b) A machine capable of carrying out complex tasks automatically.
3. Interactive	c) A feature related to the face.
4. Provoke	d) An intelligent program that can help users perform tasks.
5. Recognition	e) The ability to identify someone or something.
6. Clarify	f) To make something easier to understand.
7. Scientist	g) A person who studies or conducts experiments in a scientific field.
8. Accurate	h) Something engaging or allowing active participation.
9. Robot	i) To incite a reaction or response.
10. Milestone	j) Free from error or very precise.

Exercise 3: Choose the correct word to complete the sentences.

1. Which term refers to software that allows computers to recognize faces?
    a) Recognition
    b) Gesture

    c) Proficiency

    d) Platform

2. The AI system must be _____ before it can analyze data.

    a) Arranged

    b) Activated

    c) Proved

    d) Explored

3. A _____ was reached when the robot successfully climbed the slope.

    a) Platform

    b) Evolution

    c) Milestone

    d) Delivery service

4. Which device often uses AI to clean floors?

    a) Vacuum cleaner

    b) Robot

    c) Battery

    d) Facial scanner

5. The teacher asked the AI assistant to _____ the difficult concept for students.

    a) Provoke

    b) Clarify

    c) Limit

    d) Depend

6. AI tools can create _____ dashboards that adapt to users' needs.

    a) Personalized

    b) Complex

    c) Endangered

    d) Interactive

7. The app offers _____ support, responding to queries in real time.

    a) Instant

    b) Dangerous

    c) Proficient

    d) Accurate

8. A _____ studies AI systems and their impact on society.

    a) Travel agent

    b) Scientist

    c) Engineer

    d) Programmer

9. The system is _____ of understanding multiple languages.

    a) Smart

    b) Capable

    c) Guided

    d) Proficient

10. This program helps students _____ how AI impacts their daily lives.

    a) Repair

    b) Explore

    c) Offer

    d) Improve
