READING 2 (Items 5–10)

Read the text. Then complete the task.

The world's oceans are becoming more and more polluted. I believe that humans are responsible for this pollution. Many sea animals are badly affected by ocean pollution. Therefore, it is our duty to clean up the oceans around the world for future generation. To begin, most of the pollution in our ocean starts from the land. People throw rubbish on the beaches, and it ends up in the oceans. Also, factories throw their waste into the water.

In fact, more than 70% of the earth's surfaces covered with ocean water, so it will be hard not to be affected by pollution. For example, animals may get trapped in plastic bags in the water such as dolphins or turtles. Lots of sea animals die because they eat these plastic bags.

Sadly, not only animals are victims of the pollution, people themselves are also affected by ocean pollution. They eat seafood that may contain chemicals and heavy metals. What can we do about this problem?

In my opinion, everyone needs to help keep beaches and oceans clean. No one shouldn't throw his trash and rubbish in the sea. Environment organizations and charities work hard to inform people about the dangers of sea pollution. For example, they encourage people and shops to use recyclable and reusable plastic bags. This will help save money and protect endangered sea animals.
