PART 3:

SWAN

Swans are (0) largest birds in the duck family. There are six different kinds (1) swans that have white bodies, but in a few parts of the world, there are black swans too. Swans are clever and remember people who have been kind or unkind to them! A frightened or really angry swan can break a man's leg (2) its strong wings!

Swans live on rivers and lakes. But in the winter months, some might live near the sea because salt water is usually a little warmer than river water. Swans don't usually fly very far from the place where they build their (3) It takes between 35 and 42 days for a baby swan, which (4) called a 'cygnet', to break open its egg!

A baby swan is grey (5) white. Wild swans usually live for about seven years, but some live a lot longer. A swan eats underwater plants. It finds these by putting its long (6) deep into the water and its tail up into the air! Swans might (7) eat small frogs and insects.
