

1 Read the essay quickly and choose the best title.

- a Should we send people to Mars?
b Is space exploration a good thing?
c Which planet should we visit next?

¹ *Many people believe* that the next step in space exploration is sending astronauts to Mars. It sounds exiting, but ² _____ it?

³ _____, we might discover things we need on Earth, like oil or gas. ⁴ _____, we already know that there is a lot of methane gas on Mars, and it can be used to make plastic. ⁵ _____ we could discover new forms of life. ⁶ _____ there is frozen water on Mars and possibly even running water. This may mean there are other forms of life there.

⁷ _____, a manned mission to Mars would be incredibly expensive, at over \$50 billion. The spacecraft would need to take food, water, oxygen and medical supplies, and these things would have to be launched into space. ⁸ _____ we could spend this money on solving the problems we already have on Earth. ⁹ _____, it's very dangerous. We don't know the effects of being in space and of weightlessness on the human body for such a long period of time. In ¹⁰ _____, the possible human cost is too great a risk.

¹¹ _____, while living on Mars might seem like a good idea, I think we have big problems to solve on Earth first.

2 Complete gaps 1–6 in the essay with phrases a–f.

- a For example
b ~~Many people believe~~
c It seems

WRITING TIME

7 Write an essay answering the question in Exercise 6.

1 Find ideas

Make notes for your essay. Think about:

- a short introduction and conclusion.
- your reasons for and against, and your final decision.

2 Plan and write

- Organise your ideas into paragraphs. Use the essay in Exercise 1 to help you.
- Write a draft of your essay.

3 Check

- Check language: have you used linkers of addition?
- Check grammar: have you used any conditionals?
- Write the final version of your essay.

Self-check

Vocabulary

- 1 Complete the sentences with the words below. There is one extra word.

comet engine galaxy gravity orbit
