

**1.1.12 EXPERIMENTING**

Choose and drag the steps below to put them in a correct order when planning an experiment.

|                           |                                                        |                        |                                     |
|---------------------------|--------------------------------------------------------|------------------------|-------------------------------------|
| Controlling the variables | Collecting and interpreting data                       | Testing the hypothesis | Listing the apparatus and materials |
| Planning the steps        | Identifying the problem and making a problem statement | Making conclusion      | Making a hypothesis                 |
| Writing a report          | Planning an experiment                                 |                        |                                     |
