

Quiz 3

Vocabulary

1. It is a huge sea animal that breathes air, not water. Some are really big, and they eat tiny sea creatures like krill or fish.
2. It is a soft, squishy animal that lives in the ocean. It doesn't move but gets its food by filtering water through its body.
3. It is a part of the ocean that is really deep, dark, and cold. Sunlight doesn't reach there, so it's very different from the top levels.
4. It means something is no longer there. For example, a fish species might no longer be found if it's in danger or if there's too much fishing.
5. It is a level of water in the ocean. For example, the top level gets sunlight, while the deeper ones are darker and colder.
6. It is when harmful things, like trash, oil, or chemicals, get into the ocean and hurt the animals and plants living there.
7. It is something in the ocean, like fish or seaweed, that we can use for food, energy, or other needs.
8. It is the light that comes from the sun. It helps plants and animals in the ocean grow, especially in the top part of the water.
9. It is a special area in the ocean where certain things happen, like where fish live, or where the water is warm or cold.
10. It is a sea animal that has eight arms and two long tentacles. It moves by squirting water out of its body and can change color to hide from predators.
