

WHAT IS A ROCK?

1. Multiple Choice (Selection)

Choose the correct answer for each question:

1. **What are the three types of rocks?**

- Igneous, Metamorphic, Fossil
- Sedimentary, Volcanic, Igneous
- Fossil, Magma, Granite
- Igneous, Metamorphic, Sedimentary

2. **How are igneous rocks formed?**

- By high pressure and heat
- From cooling magma or lava
- From the accumulation of sediments
- From plant remains

3. **Which rock type contains fossils?**

- Sedimentary
- Igneous
- Metamorphic
- Granite

4. **What type of rock is slate?**

- Sedimentary
- Igneous
- Metamorphic
- Magma

2. Read the definitions and write the correct type of rock: sedimentary, igneous or metamorphic.

- Rocks formed from magma or lava. _____

- Rocks formed by the accumulation of sediments. _____

- Rocks that were transformed by heat and pressure. _____

3. Fill in the gaps (Gap filling)

Complete the sentences using the words in the box:

(igneous, metamorphic, sedimentary, magma, fossils, coal, limestone, marble)

1. _____ rocks are formed from cooling _____.
2. _____ rocks contain _____, which are the remains of living things.
3. _____ is a type of _____ rock used in construction.
4. _____ is a sedimentary rock formed in swampy areas.

4. Sort the rocks into their correct type.

(limestone, granite, slate, pumice, coal, basalt, marble, clay, coal)

Igneous	Sedimentary	Metamorphic
