

ĐỀ KIỂM TRA GIỮA KÌ 2 TIẾNG ANH 7 GLOBAL SUCCESS

I. PHÁT ÂM VÀ TRỌNG ÂM.

Chọn từ có phần gạch chân phát âm khác với các từ còn lại.

1. A. traffic
B. plane
C. station
D. nature
2. A. visited
B. decided
C. wanted
D. needed
3. A. environment
B. recycle
C. vehicle
D. helicopter

Chọn từ có trọng âm chính rơi vào vị trí khác với các từ còn lại.

4. A. pollution
B. energy
C. natural
D. environment
5. A. pedestrian
B. helicopter
C. renewable
D. dangerous

II. TỪ VỰNG VÀ NGỮ PHÁP.

Chọn đáp án đúng nhất để hoàn thành câu.

6. If we _____ more trees, we can help reduce air pollution.
A. plant

B. planted

C. planting

D. plants

7. Solar energy is a _____ source of energy because it will never run out.

A. renewable

B. non-renewable

C. limited

D. dangerous

8. My brother _____ to school by bus every day.

A. go

B. goes

C. going

D. is going

9. We should use _____ bags instead of plastic bags to protect the environment.

A. paper

B. plastic

C. metal

D. glass

10. If people _____ public transport more, there will be less traffic jam.

A. use

B. used

C. using

D. will use

Tìm từ đồng nghĩa hoặc trái nghĩa với từ gạch chân.

11. Reduce the amount of waste you produce every day.

A. increase

B. decrease

C. reuse

- D. recycle
12. Solar energy is abundant in many parts of the world.
- A. limited
 - B. plentiful
 - C. expensive
 - D. cheap
13. The government is trying to prevent air pollution.
- A. cause
 - B. stop
 - C. increase
 - D. reduce
14. Using public transport is beneficial for the environment.
- A. harmful
 - B. useful
 - C. dangerous
 - D. safe
15. We should conserve energy to protect the environment.
- A. waste
 - B. save
 - C. use
 - D. destroy

Chọn đáp án đúng để hoàn thành đoạn văn sau.

Energy is very important in our daily life. We use energy (16) _____ many things, such as cooking, heating, and transportation. There are two types of energy: renewable and non-renewable. Renewable energy comes from sources like the sun, wind, and water. These sources will never (17) _____ out. Non-renewable energy, on the other hand, comes from sources like coal, oil, and natural gas. These sources are (18) _____ and will run out one day. To protect the environment, we should use more renewable energy and (19) _____ our use of non-renewable energy. We can also save energy by turning off lights when we leave a room and using energy-efficient appliances. By doing these things, we can help (20) _____ the Earth for future generations.

16. A. for
B. with
C. to
D. by
17. A. run
B. go
C. take
D. make
18. A. unlimited
B. limited
C. renewable
D. non-renewable
19. A. increase
B. reduce
C. reuse
D. recycle
20. A. protect
B. pollute
C. destroy
D. damage

III. ĐỌC HIỂU.

Choose the correct word to fill in each blank.

The environment is everything around us, both natural and man-made. It includes the air we (21) _____, the water we drink, and the land we live on. However, human activities are causing many environmental problems. For example, factories release harmful gases into the air, which causes air (22) _____. People also throw trash into rivers and oceans, which pollutes the water. To protect the environment, we need to (23) _____ our habits. We should recycle more, use less plastic, and plant more trees. Governments should also make laws to (24) _____ companies from polluting the environment. If we all work together, we can make the Earth a cleaner and (25) _____ place to live.

21. A. breathe
B. eat
C. drink
D. see
22. A. pollution
B. solution
C. population
D. protection
23. A. change
B. keep
C. stop
D. continue
24. A. allow
B. prevent
C. encourage
D. help
25. A. dirtier
B. cleaner
C. smaller
D. bigger

Read the passage and answer the questions.

Renewable energy is energy that comes from natural sources like the sun, wind, and water. These sources are unlimited and will never run out. Solar energy is one of the most popular types of renewable energy. It is produced by capturing the energy from the sun's rays. Wind energy is another type of renewable energy. It is produced by using wind turbines to capture the energy from the wind. Hydropower is also a type of renewable energy. It is produced by using the energy from moving water. Renewable energy is important because it helps reduce pollution and protects the environment. It is also a sustainable source of energy, which means it can be used for a long time without running out.

26. What is renewable energy?
27. What are three examples of renewable energy sources?

28. How is solar energy produced?
29. Why is renewable energy important?
30. What does "sustainable" mean in this context?

IV. VIẾT LẠI CÂU

31. We should use public transport to reduce air pollution.

→ If we _____.

32. Planting more trees will help the environment.

→ If we _____.

33. She doesn't have a car, so she walks to work.

→ If she _____.

34. They are building a new solar power plant in this area.

→ A new solar power plant _____.

35. We must save energy to protect the environment.

→ Energy _____.

V. SẮP XẾP CÂU THÀNH ĐOẠN VĂN

36. A. First, we should turn off the lights when we leave a room.
- B. Finally, we can use public transport instead of driving our cars.
- C. There are many ways to save energy in our daily lives.
- D. Second, we should use energy-efficient appliances.
- E. By doing these things, we can help protect the environment.
