

The Right Food

You need to eat the right food. Carbohydrates give your body energy. Fiber helps to move food through your stomach and intestines. Brown bread and brown rice have lots of fiber. Fruit and vegetables also have fiber, and vitamins that help you to stay healthy.

Proteins help your muscles to grow. Meat, fish, and eggs have proteins. Dairy food like milk, yogurt, and cheese have proteins, fat, and calcium. You need calcium for healthy bones. You need iron for healthy blood. Meat, eggs, and green vegetables have iron.

This plate shows how much of each type of food you should eat. Eat lots of fruit and vegetables, and food with proteins and carbohydrates. Don't eat too much food with sugar, fat, and salt. You need a little fat to stay healthy, but too much fat can make you fat! Too much sugar and salt is unhealthy, too. Sugar is also bad for your teeth.

You should drink about eight glasses of water every day.

3 The Right Food

← Read pages 8–9.

1 Write the words.

bread rice fish fruit vegetables milk

1 fruit

2

3
