- They help to keep nature clean by eating the remains of dead animals.

earthworm

cat

mosquito

10

What is the body of a reptile covered with? 0,5 POINT

- ☐ a) Feathers. ☐ c) Fur.
- ☐ b) Bare skin. ☐ d) Scales.

2nd PART: 5 POINTS

11

Write the name of two animals which match the descriptions. 1 POINT

- a. They breathe through lungs. ► _____
- b. They breathe through gills. ► _____
- c. They have scales. ► _____
- d. They move using fins. ► _____

12

Circle the way these groups of animals breathe. 1 POINT

- Mammals breathe through lungs / gills.
- Birds breathe through lungs / gills.
- Fish breathe through lungs / gills.
- Adult amphibians breathe through lungs / gills.
- Reptiles breathe through lungs / gills.
- Baby amphibians breathe through lungs / gills.

13

What group does the animal in the photo belong to? Tick its characteristics.

1 POINT

- It belongs to the group of

- ☐ It has skin covered with fur.
- ☐ It has fins.
- ☐ It has four legs.
- ☐ It has a mouth with lips and teeth.

14

What group do these animals belong to?

1 POINT

A

B

C

D

E

15

Tick (✓) the correct options.

1 POINT

All mammals:

a. have bones.

☐

b. drink their mother's milk.

☐

c. are born from their mother's womb.

☐

d. can walk when they are born.

☐
