

Risk Reward Ratio with Last Order Indicator for MT4 Download - Free - [TF Lab]

The **Risk-Reward Ratio with Last Order (RRO) Indicator** is a practical and professional tool for traders who want to accurately calculate their **risk-to-reward** ratio on the Meta Trader 4 (MT4) platform.

The **RRO Indicator** measures the **stop loss** ratio to the entry point. It compares it with the **take profit**, automatically calculating the risk-to-reward ratio and displaying it in the top left corner of the chart. This tool allows traders to better manage their trades and make smarter decisions regarding risk and reward.

Indicator Table

Category	Risk Management - Money management - Trading assist
Platform	Meta Trader 4
