Indicator at a Glance

The **Currency Pair Correlation Indicator** is valuable for **traders** seeking to identify the **correlation** between different currency pairs. Through the indicator's settings, traders can select two desired symbols and easily observe their interaction in the **histogram window**.

This tool helps traders better understand the **relationships between currency pairs**, enabling them to make more informed **trading decisions**.

Bullish Trend Conditions of the Indicator (Buy Positions)

The **USD/CAD** currency pair is shown in the 1-hour timeframe in the image below. In this example, we compare **USD/CAD** with **CAD/CHF**. Since these two symbols have a negative correlation, the crossing of the two oscillator lines and the appearance of the red histogram indicate that **USD/CAD** is ready for a downward trend, while **CAD/CHF** is set for an upward trend.

Bullish Trend Conditions in the Currency Pairs Correlation Indicator

Bearish Trend Conditions of the Indicator (Sell Positions)

In the 1-hour chart of **CAD/CHF**, we have compared **USD/CAD** with **CAD/CHF**. In this scenario, the **Currency Pairs Correlation Indicator** shows a negative correlation, where the increase in **CAD/CHF**, represented by the red histogram, leads to a decline in **USD/CAD**, initiating a bearish trend.
