Unit 3: Music

Ngo Quoc Khanh - URFLT SA2204

Music is a universal language that brings people together. Many students enjoy playing a musical instrument like the piano, guitar, or violin. Learning an instrument takes practice, but it helps develop patience and creativity.

Some students also join music competitions or talent shows. Each participant gets a chance to perform in front of an audience, building confidence and improving their skills. A great performance requires hard work and dedication. Many famous musicians started with small performances before becoming successful.

Today, social media plays a big role in the music industry. Young artists share their music on platforms like YouTube and TikTok, reaching a global audience. Some become famous overnight when their videos go viral.

.

While some people are naturally talented, others improve through practice and determination. No matter the skill level, music is a powerful way to express emotions and connect with others.
