Many people like to eat pizza, but not everyone knows how to make it. Making the perfect pizza can be complicated, but there are lots of ways for you to make a more basic version at home.

When you make pizza, you must begin with the crust. You can make the crust yourself or you can use a prepared crust that you buy from the store. After you have chosen your crust, you must then add the sauce. Making your own sauce can take a long time. You have to buy tomatoes, peel them, and then cook them with spices. If this sounds like too much work, you can also **purchase** jarred sauce from the store. Many jarred sauces taste almost as good as the kind you make at home.

Now that you have your crust and your sauce, you need to add the cheese. Cheese comes from milk, which comes from cows. Do you know how to milk the cow? Do you know how to turn that milk into cheese? If not, you might want to buy cheese from the grocery store instead of making **it** yourself.

When you have the crust, sauce, and cheese ready, you can add other toppings. Some people like to put meat on their pizza, while other people like to add vegetables. Some people even like to add pineapples! The best part of making a pizza at home is that you can customize it by adding your own favorite ingredients.

- What is the main idea of the passage?
