Topic: Organs and their products of excretion

Instruction: Choose the correct answer from the box

Organs and Their Products of Excretion
Excretion takes place in excretory organs. Let us find out about the excretory organs and their products.

The diagram shows a boy with three callouts to his body parts, each with an empty box for an answer:

- Skin:** A callout to the skin on his arm shows hair follicles and sweat glands. Below it is a box with a yellow top half and a blue bottom half.
- Lungs:** A callout to his chest shows the lungs. To the right is a box with a yellow top half and a blue bottom half.
- Kidneys:** A callout to his back shows the kidneys. Below it is a box with a yellow top half and a blue bottom half.

Based on the information above, try to identify the excretory organs and their products.
