Read the passage and choose the correct answer to each question.

Who are the best drivers? Which drivers are the safest on the roads? A recent survey shows that young drivers, especially those who are new to driving, have a higher rate of causing accidents. Older drivers are usually more careful. Young men have the most accidents. They often drive faster cars with bigger motors, which can be dangerous.

One interesting fact from the survey is that passengers can affect how a driver behaves. When young men drive with their friends in the car, they often drive more carelessly. But when their wife or girlfriend is in the car, they drive better. This is not the same for women. Women tend to drive more dangerously when **their** husband or boyfriend is with them. However, when women drive with their small children, they drive more slowly and safely because they want to keep their children safe.
