RSI Extreme Zones indicator for MT4 Download - Free

The **RSI Extreme Zones** indicator is an advanced oscillator based on the classic 14-period RSI, available on the **MetaTrader 4 (MT4) indicator**. This oscillator (RSI EZ) visually displays color changes: when the RSI oscillator enters the **overbought zone (above 70)**, it turns **red**, and when it enters the **oversold zone (below 30)**, it turns **blue**.

This feature helps traders quickly and accurately identify when the price enters extreme zones on the chart, enabling them to make better trading decisions.

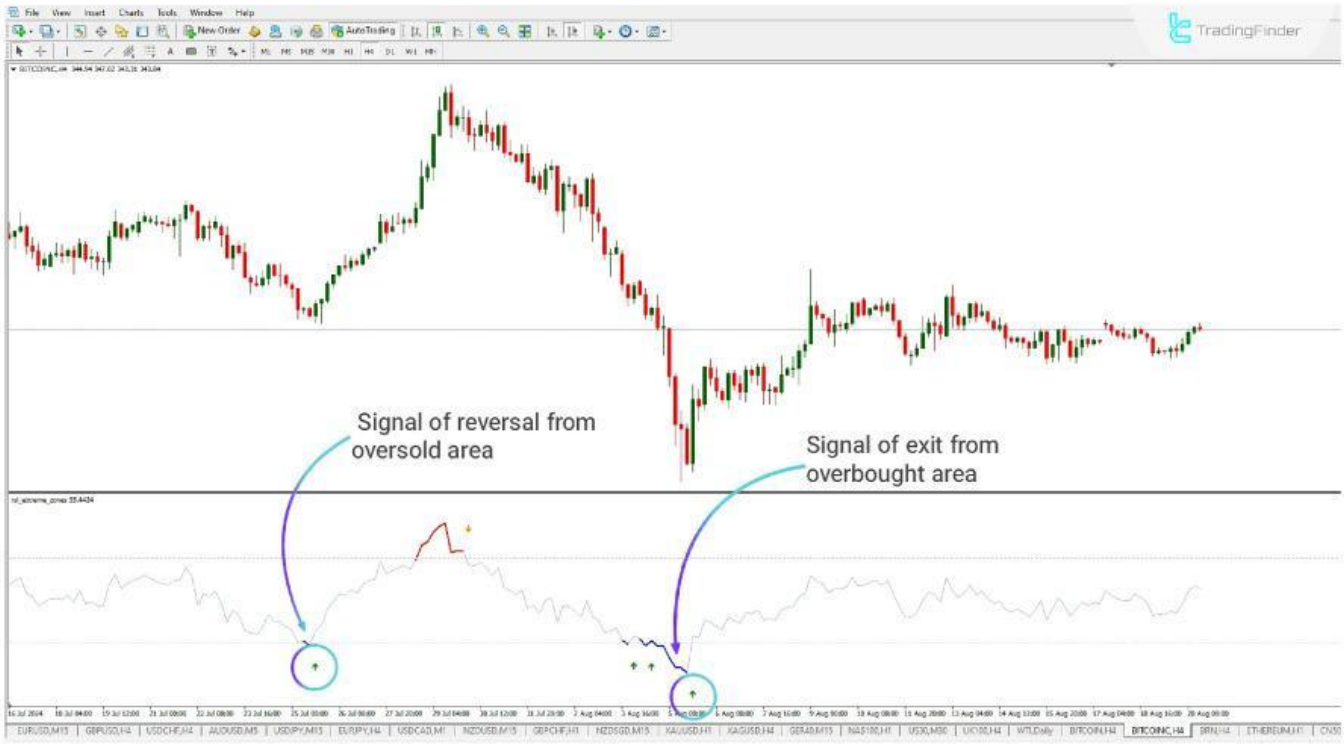
Indicator at a Glance

The**RSI Extreme Zones**indicator helps traders quickly identify **overbought** and **oversold zones** with unique features. When entering saturation zones, the indicator alerts traders by changing colors and displaying **buy** or **sell signals**.

The oscillator changes to **blue** upon entering the **oversold zone** and turns **red** when reaching the **overbought zone**. These features enable traders to make more precise decisions for **entering** or **exiting trades**

LIVEWORKSHEETS

Buy Signal (Uptrend Signals)



4-hour Bitcoin Cash (BITCOINC) chart

In the **4-hour Bitcoin Cash (BITCOINC)** chart, the RSI oscillator turns blue when the price enters the **oversold zone (below 30)**. When the oscillator moves back above the 30 level, the **RSI EZ** indicator issues a **buy signal** on the chart. This feature helps traders accurately identify potential entry points for buy trades.

LIVEWORKSHEETS

Sell Signal (Downtrend Signals)

Daily WTI Oil chart

In the **daily WTI Oil** chart, the RSI oscillator turns red when it enters the **overbought zone**. When it exits the overbought zone, the **RSI EZ** indicator issues a **sell signal** to alert traders, helping them prepare for potential sell trades.
