

Protect the ocean

1. Draw a line to match each problem with a good solution.

Problem	Solution
Too much CO ₂ in the air	Plant more trees
Coral reefs turning white	Reduce pollution
Sea creatures losing their shells	Use less plastic
People littering on the beach	Pick up trash

2. Drag the answers to the questions

steady water temperature and clear water
not pollute them or the atmosphere
they become weak and die

1. What do corals and shellfish need to stay strong?

2. How does ocean acidification harm them?

3. What can we do to **help the ocean** stay healthy?
