15 - MINUTE TEST

Unit 2: City life

The test has 4 pages. Read carefully and answer 15 questions.

Part 1

Read the passage about city life carefully. Choose the most appropriate word from options A, B, C, or D to complete each blank space (1-7)

Life in the city is exciting but also challenging. The more people live in a city, the noisier it gets. The downtown area is always _____(1) with people, and the traffic _____(2) makes it hard to move around. Therefore, many people have started using the metro or sky train to avoid traffic jams.

However, life in the city can also be enjoyable. There are many activities to do, from visiting museums to hanging _____(3) friends in cafés. The _____(4) entertainment options there are, the more exciting life becomes. At night, the city lights make the streets look beautiful, and there is always something new to explore.

Overall, _____(5) city life has problems, it is still a great place to live. To make city life better, people should _____(6) down on pollution and create more green areas. The more trees a city has, the _____(7) the air becomes. If more people care about their city, it will be better for everyone.

Part 2

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct word or phrase that best fits each of the numbered blanks from 1 to 8.

Many large cities are developing better public transport systems to solve traffic problems. The metro is popular because it's fast and reliable. It doesn't get stuck in traffic jams, so people save time traveling. Sky trains are another good option for crowded cities. Although they can be crowded at rush hour, they're always on time and offer a nice view of the city.

Some teens prefer to get around by bicycle. It's convenient because they can ride to places where buses don't go. Cycling might be slow sometimes, but it helps people avoid traffic congestion and stay healthy.

Traditional buses remain a common but less ideal choice in bustling urban areas. They are often packed with commuters and can be delayed due to congested streets. Despite these drawbacks, buses are more affordable than other public transport options and reach many areas of the city.

Walking is becoming increasingly popular in liveable city centers with good public amenities. Modern urban planning includes pedestrian-friendly zones in downtown areas, where cars are restricted. This not only reduces pollution but also creates safer spaces for residents. The more pedestrian-friendly a city becomes, the more attractive it is to both locals and tourists.

City authorities are carrying out studies to understand transportation habits. They've found that the more convenient the public transport system is, the fewer private vehicles people use. This leads to less congested roads and a reduction in the concrete jungle atmosphere that characterizes many metropolitan areas

Question 1 What is the main idea of the passage?

- A Bicycles are the best form of transportation in cities
- B Various transportation options in cities have different advantage and challenges
- C City authorities should ban private vehicles
- D Walking is the healthiest way to travel in urban areas

Question 2 The word "**reliable**" in the first paragraph is CLOSEST in meaning to

- A expensive
- B fast
- C dependable
- D comfortable

Question 3 The word "**bustling**" in the third paragraph is OPPOSITE in meaning to

- A quiet
- B modern
- C dangerous
- D polluted

Question 4 According to the passage, what is a disadvantage of buses?

- A They are more expensive than other options
- B They don't reach many areas of the city
- C They can be delayed due to traffic congestion
- D They don't have air conditioning

Question 5

Which form of transportation is mentioned as helping people stay healthy?

- A Metro
- B Sky train
- C Bus
- D Bicycle
