XAMD/AMDX [01] Quarterly Theory Cycles Indicator ICT Style TradingView - Free - [TFlab]

TradingView MetaTrader4 MetaTrader5

Access to TradingView

The **XAMD/AMDX [01] Quarterly Theory Cycle Indicator** is an advanced tool for precise price analysis and identifying trend **reversal** points on the **TradingView platform**.

Designed based on **Smart Money Concepts (SMC)** and **ICT** trading styles, this **TradingView liquidity indicator** divides trading days into four distinct phases using the **Power of 3 strategies**.

LIVEWORKSHEETS

However, as soon as the price entered the distribution phase, it began its main move as an **upward** trend.

"XAMD/AMDX" Strategy in a Bullish Trend

Performance of the Indicator in a Bearish Trend

The **ETH cryptocurrency** price chart in the 15-minute timeframe exemplifies how the **XAMD/AMDX [01]** indicator works in a bearish trend.

During the **manipulation** phase, fake upward moves occur, but as soon as the price enters the **distribution** phase, the main market move begins, and the trend turns **bearish**.

Indicator Settings

Overview of Indicator Settings

- **Accumulation:** Settings related to the accumulation phase;
- **Manipulation:** Settings related to the manipulation phase;
- **Distribution:** Settings related to the distribution phase;
- **Continuation/Reversal:** Settings related to the continuation or reversal phase.

Conclusion

The **XAMD/AMDX Quarterly Theory Cycle Indicator** divides the daily market movements into four phases.

Each phase exhibits distinct price behavior; **analyzing** these behaviors makes forecasting future price **movements** clearer and more precise.

This **TradingView smart money indicator** allows traders to align their strategies with *the primary* ***market maker moves***.
