LIVEWORKSHEETS

1 Read the text. Choose the correct words and write them on the lines.

EATING IN SPACE

Today, foods in space are similar to the foods we eat on Earth. On the International Space Station, there are more than 100 foods

1 on the menu.

2 There are three meals a day, as well as _____ that can be eaten between meals.

3 Drinks include tea, coffee, fruit _____ and lemonade.

4 Salt and _____ are available too, but only as liquids. You might

5 need a lot of these, because food can _____ quite different in space. Some astronauts say it's really boring, so they have to use more spices and sauces.

6 What about _____? Do astronauts really eat ice cream in space? Well, they do, but not the dried type! They can eat normal ice cream, but only near the start of their space flight, while the freezer is working. After that, they're more likely to eat things like yoghurt

7 in any of the usual _____, like vanilla, strawberry or blueberry.

8 One thing's for sure – you need to hold on tight to your knife and _____ in space. If you don't, they float away!

1	plate	~~menu~~	café	5	taste	lick	invent
2	meals	desserts	snacks	6	desserts	sauces	sweets
3	water	sweets	juice	7	tastes	flavours	spices
4	pepper	biscuits	strawberries	8	chopstick	bill	fork

2 Refer back to Student's Book page 53. What drink did you invent? What do you need and how do you make it?

My invented drink: _____

Ingredients: _____

To make it ...

1. _____
2. _____
3. _____
