

**a. Now, listen and fill in the gaps**

**Susan:** Good morning, John, Michael. So let's discuss these new \_\_\_\_\_ buses. Should we use them in our city? John, what do you think?

**John:** Well, Susan, I don't like them. First of all, they'll probably cost a lot of \_\_\_\_\_.

**Susan:** Ok, John, anything else?

**John:** Yeah. Our city already has buses, but people don't use them. They \_\_\_\_\_ won't use the flying buses either.

**John:** I see. Maybe you're right. Michael, what do you think?

**Michael:** I don't agree with John. Lots of people have said that they don't use our buses because of traffic \_\_\_\_\_. They just move too slowly. Flying buses can avoid traffic jams \_\_\_\_\_, so they travel much faster.

**Susan:** Yes, that's right, Michael. They're definitely \_\_\_\_\_ than our old buses, and they're much safer to.

**John:** I see. That sounds good. But I'm still worried about the \_\_\_\_\_.

**Michael:** Michael, you look like you want to say something?

**Michael:** Yes, Susan. Actually, it's about cost. If the \_\_\_\_\_ isn't too expensive, I think lots of \_\_\_\_\_ will want to fly every day. I think our city will collect a lot of money from this.

**Susan:** That's right. I think they could possibly \_\_\_\_\_ more people to visit our city to if we increase \_\_\_\_\_. It'll benefit everyone. So John do you agree?

**John:** Yes, I see your point. Okay, then.

**Susan:** Fantastic. So we all agree.

**b. Now, listen and match**

	1. probably	a. faster than the old buses
	2. probably won't	b. increase the number of visitors
	3. definitely	c. be very expensive
	4. possibly	d. use the new buses
