Worksheet 1

**REVISION: MASS, CAPACITY AND LENGTH****A. Review.****1/ Changing unit of measurement.**

	Example								
<p><b>Units of mass</b></p> <p><b>1 kilogram = 1000 grams (or 1 kg = 1000 g)</b></p> <p>We can convert <b>kilogram to gram</b> using <b>multiplication</b>.</p>	<p><b>1 kg = 1000 g</b></p> <p>So, 3 kg = <math>3 \times 1000 = 3000</math> g</p>								
<p><b>Units of capacity</b></p> <p><b>1 liter = 1000 milliliters (or 1 L = 1000 mL)</b></p> <p>We can convert <b>liter to milliliter</b> using <b>multiplication</b>.</p>	<p><b>1 L = 1000 mL</b></p> <p>So, 7 L = <math>7 \times 1000 = 7000</math> mL</p>								
<p><b>Units of length</b></p> <p>We can convert <b>from larger unit to smaller unit</b> using <b>multiplication</b>.</p> <table border="1"><tr><td>meter</td><td>decimeter</td><td>centimeter</td><td>millimeter</td></tr><tr><td>m</td><td>dm</td><td>cm</td><td>mm</td></tr></table> 	meter	decimeter	centimeter	millimeter	m	dm	cm	mm	<p><b>1 dm = 10 cm</b></p> <p>So, 6 dm = <math>6 \times 10 = 60</math> cm</p> <p><b>1 m = 1000 mm</b></p> <p>So, 9 m = <math>9 \times 1000 = 9000</math> mm</p>
meter	decimeter	centimeter	millimeter						
m	dm	cm	mm						

**2/ Structures.**

The mass of _____ is _____	The mass of _____ is about _____
The mass of a paper clip is 1 gram. 	The mass of a candy is about 5 grams. 

The capacity of _____ is _____	The capacity of _____ is about _____
The capacity of a bowl is 3 liters. 	The capacity of a pitcher is about 1000 milliliters. 

The length of _____ is _____	The height of _____ is _____
 The length of pencil is 13 centimeters.	 The height of a building is 50 meters.

## B. Practice.

Task 1: Choose the best unit for each below item.

Items	Units
a. The length of a bug 	mm      cm      dm      m
b. The mass of a leaf 	g      kg
c. The capacity of a bathtub 	mL      L

Task 2: Tick at the best estimation.

a.

7 dm

7 cm

b.

1 cm

1 m

c.

3 g

3 kg

d.

300 mL

300 L

e.

1 mm

1 dm

f.

4 kg

4 g

Task 3: Find missing numbers.

a.  $17 \text{ dm} = \underline{170} \text{ cm}$

b.  $2 \text{ kg} = \underline{\quad\quad\quad} \text{ g}$

c.  $6 \text{ L} = \underline{\quad\quad\quad} \text{ mL}$

d.  $19 \text{ dm} = \underline{\quad\quad\quad} \text{ mm}$

e.  $94 \text{ cm} = \underline{\quad\quad\quad} \text{ mm}$

f.  $37 \text{ m} = \underline{\quad\quad\quad} \text{ mm}$

**Task 4:** Solve the following problems.

- a) The mass of a tiger is about 270 kilograms. An elephant is 9 times as heavy as a tiger.  
How many kilograms does an elephant weigh about?

Equation: \_\_\_\_\_ = \_\_\_\_\_

Word answer: The mass of an elephant is about \_\_\_\_\_ kilograms.

- b) The capacity of a milk carton is 1 liter and the capacity of a milk bottle is 160 milliliters.  
How many milliliters can the milk carton hold more than the milk bottle?

Converting: 1 L = \_\_\_\_\_ mL.

Equation: \_\_\_\_\_ = \_\_\_\_\_

Word answer: The milk carton can hold more than the milk bottle \_\_\_\_\_ milliliters.

- c) What is the total height of mom and girl **in centimeter**?

Converting: 16 dm = \_\_\_\_\_ cm

1 m = \_\_\_\_\_ cm

Equation: \_\_\_\_\_ = \_\_\_\_\_

Word answer: The total height of mom and girl is \_\_\_\_\_ centimeters.
