

Future of Communications

1. What we need to know is ...

A. it might be too late tomorrow.

2. If we don't do anything about aggression promoting TV programmes, Internet and mobile phone addictions today, ...

B... what we are going to do about the changes that all these new inventions bring along and how they will affect our lives.

3. It is always possible ...

C. whether new means of communication will be available in the future and whether they will change the quality of our life.

4. Sometimes we take it for granted ...

D. ... we imagine something really revolutionary like time travel or telepathy.

5. Though it seems ...

E. ... that our life is becoming more and more comfortable and successful with all the new means of communication and new devices – plasma TVs, portable computers, wireless Internet and smart phones.

6. When we think about the future,

F. ... that there is a contradiction between the advantages of new technologies and the disadvantages we can't help noticing.

7. We don't know ...

G. that new ways of keeping in touch will appear and replace the old ones.

8. But the thing that worries many of us most is ...

H. ... as if everything has already been created, inventors surprise us with new gadgets every year.

9. It appears ...

I. ... what can be invented in 10, 20 or 50 years from now.
