Uptrend Conditions

The following price chart shows the **global gold price** against the US dollar (**XAUUSD**) in a 1-hour timeframe.

When the orange **histogram crosses** below the -100 level and then **rebounds upward**, it indicates an **oversold** condition in the market, suggesting a potential **start** of an **uptrend**.

Therefore, a return above the **-100** level can be considered a valid **Buy signal**.

Downtrend Conditions

The chart below displays the **Nikkei 225 index** in a 4-hour timeframe. When the **blue histogram** exceeds the +100 level and falls below it, the market becomes **overbought**, indicating a possible start of a **downtrend**.

Returning from the +100 level and a subsequent **downward move** can be considered a **Sell signal**.
