3 Moving Average Cross with Alert Indicator MT4 Download - Free - [TFlab]

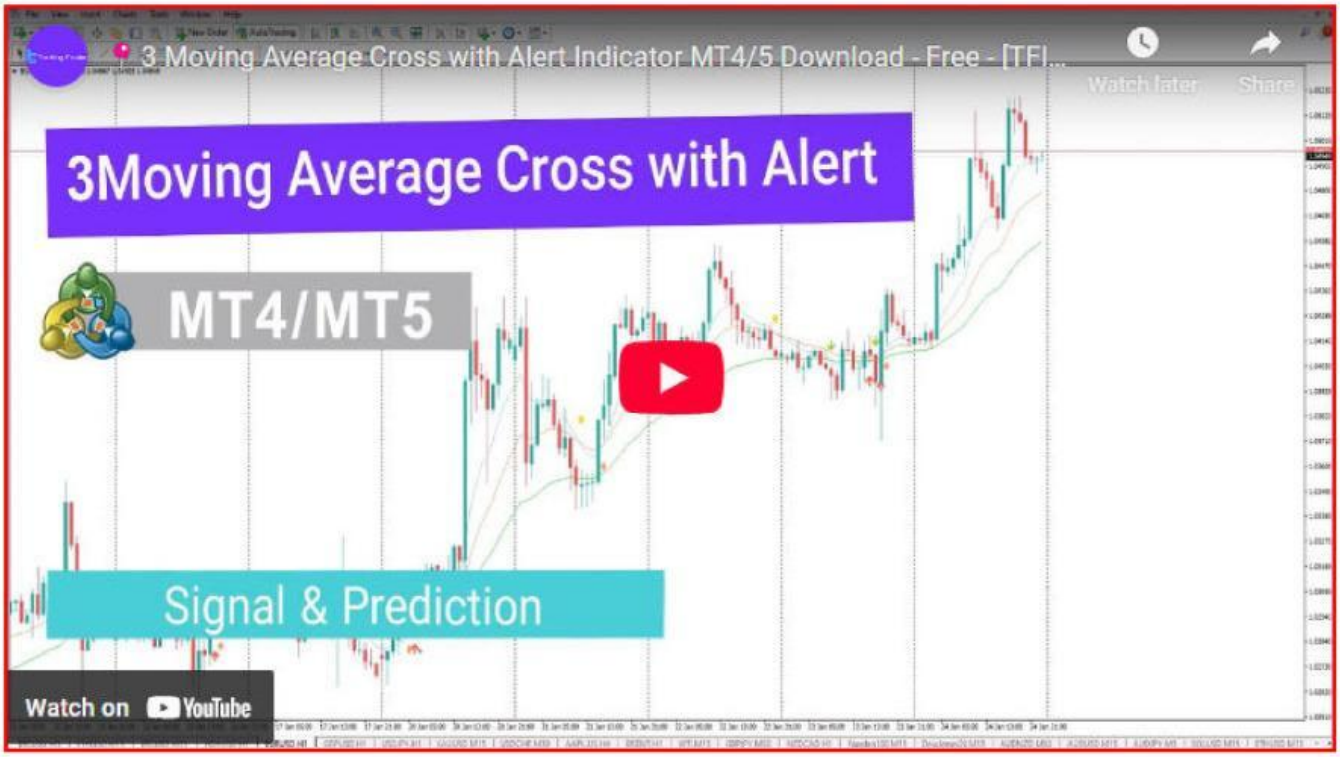

The **3 Moving Average Crossover Indicator** is a tool for MetaTrader 4 that combines three moving average lines with periods of 10, 20, and 40.

These moving average lines are categorized into **fast**, **medium**, and **slow** moving averages based on their respective periods.

The **MT4 Volatility Indicator** uses arrow markers and color signals to indicate crossover points between the **"MA"** lines.

LIVEWORKSHEETS

Bullish Trend Conditions

Based on the **4-hour chart** analysis of the **Chainlink** cryptocurrency, the **fast**, **medium**, and **slow** moving averages have intersected. The price trend has also crossed upward through the **"MA" intersections**.

In such conditions, the market can be considered **bullish**. The markers near the price point to the breakouts and intersections of the "MA" lines.

Entry signals issued by the "3 Moving Average Cross Indicator with Alert."

Bearish Trend Conditions

In a bearish trend, the **fast**, **medium**, and **slow moving averages** converge simultaneously, and the price crosses downward. Candle fluctuations below the moving average lines indicate a **bearish** trend.

The **USD/CAD** chart in the 1-hour timeframe is an example of **entry** signals during a **bearish** trend.
