Indicator in an Uptrend

The analyzed chart represents the **USD/JPY currency pair** on a **5-minute timeframe**. During the **Accumulation Phase**, the price activates **buy orders** within a range, setting the stage for the **next move**.

In the **Manipulation Phase**, the price deceptively trends **upward**, misleading **retail traders** into making **incorrect decisions**.

Upon reaching the **Distribution Phase**, **market makers** trigger **stop-losses** and collect **liquidity** from traders before the price resumes its **primary upward trend**, initiating the **main market movement**.

USD/JPY currency pair

Indicator in a Downtrend

The chart below illustrates the **GBP/USD currency pair** on a **1-hour timeframe**. Initially, during the **Accumulation Phase**, the price moves within a **defined range** without showing any clear trend.

In the **Manipulation Phase**, **institutional traders** create **false breakouts** and **deceptive moves** to entice retail traders into entering an **upward trend**.

After gathering **liquidity** and triggering **stop-losses**, the price abruptly transitions into a **downtrend**, initiating the **primary market movement.**
