

1. Írd fel az ábrákkal adott műveleteket! Figyeld meg a szabályt!

$$\frac{1}{8} + \frac{2}{8} = \frac{3}{8}$$

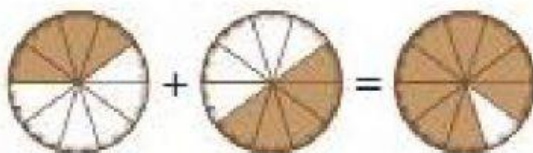

$$\frac{1}{4} + \frac{1}{4} = \frac{2}{4}$$

$$\frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

$$\frac{4}{5} + \frac{1}{5} = \frac{5}{5}$$

$$\frac{4}{10} + \frac{4}{10} = \frac{8}{10}$$

$$\frac{6}{12} + \frac{6}{12} = \frac{12}{12}$$

2. Add meg a kijelölt műveletek eredményét!

$$\frac{4}{10} + \frac{8}{10} = \frac{12}{10}$$

$$\frac{3}{7} + \frac{6}{7} = \frac{9}{7}$$

$$\frac{8}{20} - \frac{5}{20} = \frac{3}{20}$$

$$\frac{3}{6} + \frac{4}{6} = \frac{7}{6}$$

$$\frac{5}{11} + \frac{6}{11} = \frac{11}{11}$$

$$\frac{9}{7} - \frac{5}{7} = \frac{4}{7}$$

$$\frac{5}{8} + \frac{4}{8} = \frac{9}{8}$$

$$\frac{9}{10} - \frac{6}{10} = \frac{3}{10}$$

$$\frac{8}{9} - \frac{6}{9} = \frac{2}{9}$$

3. Add meg a vegyszámok tört alakját!

$$3\frac{4}{8} = \frac{24}{8} + \frac{4}{8} = \frac{28}{8}$$

$$2\frac{3}{5} = \frac{10}{5} + \frac{3}{5} = \frac{13}{5}$$

$$3\frac{4}{7} = \frac{21}{7} + \frac{4}{7} = \frac{25}{7}$$
