 Air Pollution and Its Impact

Air pollution is a serious problem in many cities around the world. It is mainly caused by emissions from vehicles, factories, and the burning of fossil fuels such as coal, gas, and oil. Every day, millions of cars, buses, and motorbikes release harmful gases like carbon dioxide and nitrogen dioxide into the atmosphere. In addition, industrial activities and power plants that use coal or oil also contribute greatly to poor air quality. Construction sites and the burning of household waste in some areas make the problem even worse.

Air pollution not only affects human health but also causes damage to the environment. Long-term exposure to polluted air can lead to respiratory diseases, such as asthma, bronchitis, and other serious lung problems. It can also increase the risk of heart attacks and reduce people's life expectancy.

Scientists and governments are working together to reduce air pollution. They encourage the use of public transport, limit industrial emissions, and plant more trees in cities to improve air quality. If pollution continues to increase, the consequences will be severe for future generations, including more diseases, environmental destruction, and climate change.

Using Smartphones to Measure Height

Smartphones today have many useful and surprising features. A great example is found in the new Apple iPhone 14 Pro, which can measure a person’s height. By using the Measure app, you simply point your phone camera at someone, and it will instantly show their height. The person must stand in front of the camera, from head to toe, for the result to be accurate. Although you can measure yourself in a mirror, it’s better to ask a friend for help.

The app works through AR (augmented reality) and a special sensor in the phone called LiDAR. LiDAR stands for “light imaging, detection, and ranging.” It sends out light pulses that bounce off the person and return to the sensor. The time it takes helps the app calculate the person’s height. This is similar to how 3D laser scanning works. While the app is advanced, some still joke that it’s not as fun as marking height on a door. Still, it shows how far technology has come in helping us in everyday life.

(TH) Question 25. What is the main idea of the passage?

- A. Smartphones cannot measure height correctly.
- B. The Measure app works only with mirrors.
- C. Technology now allows phones to measure a person's height.
- D. Marking on doors is the best way to measure height.

(NB) Question 26. What feature is used to measure a person's height in the iPhone 14 Pro?

- A. Voice assistant
- B. Screen resolution
- C. Bluetooth sensor
- D. LiDAR sensor

(NB) Question 27. What should a person do to get an accurate height result?

- A. Walk around the room
- B. Stand fully in front of the camera
- C. Sit close to the phone
- D. Hold a ruler

(NB) Question 28. What does LiDAR stand for?

- A. Light image and data recorder
- B. Light imaging, detection, and ranging
- C. Location information data reader
- D. Laser infrared device and radar

(TH) Question 29. What does the writer suggest about the app in the last sentence?

- A. It doesn't work in real life.
- B. It is perfect and has no weaknesses.
- C. It shows modern progress even if it's not always fun.
- D. It replaces traditional ways completely.

(VD) PART 2 .Write a paragraph (80 – 100 words) to describe a way of modern communication. You can use the suggestions below (1.0 point)

USEFUL LANGUAGE:

- video call
- social networks
- smartphone
- communicate online
- save time and money
- send images and voice
- help people stay connected
- popular with young people

- need strong Internet connection
- can be used for work and study

OUTLINE

Introduction: There are many modern ways of communication. I think _____ is one of the most useful.

Body:

- What it is
- What it can do (images, voice, connect people, etc.)
- Advantages (save time, no need to travel, etc.)
- Disadvantages (need Internet, can be impersonal)

Conclusion: Suggest its future use / your opinion

Writing Sample:

One of the most popular ways of modern communication is using social networks. Platforms like Facebook, Zalo, and Instagram help people stay connected by allowing them to share messages, photos, and videos instantly. This is very useful for both personal and professional communication. People can keep in touch with friends or work with colleagues even if they are far apart. Social networks also save time and money because we don't need to meet in person. However, users need the Internet and must be careful with online safety. I believe social networks will remain popular in the future.
