# PM Shri K.V.R.K.Puram Sec 2

Class 2                     Subject:Maths

Topic: Grouping and sharing

Rita bought 7 pencils of rupees 5 each. How much money will she give to the shopkeeper?

Number of pencils = [         ]   5 , 6 , 7

Cost of 1 pencil = [         ]   5, 6 , 7

Cost of 7 pencils = 5 + 5 + 5 + 5 + 5 + 5+5

[         ] × [         ] = [         ]

5, 6 , 7            5, 6 , 7            30 , 25 , 35

So, Rita will give rupees [         ] to the shopkeeper.            30 , 25 , 35
